THE ORCHARD PARTNERSHIP

The Orchard Partnership Training Practice July 2023

The Orchard Partnership are delighted to announce that we are now a registered GP training practice, helping to support the learning and development of the GPs in Wiltshire.

Our trainee GPs are qualified doctors who already have experience of working in NHS hospitals and many in other GP surgeries.

How does this affect patients?

GP trainees will be running their own clinics under the supervision of one of the Orchard Partnership GPs and will sometimes sit in on clinics to observe. You will be informed by reception if your appointment is with one of our GP trainees. If you would prefer not to be seen by a GP trainee, please inform reception.

We recognise the importance of providing a supportive and patient-focused training environment for our trainees to help them develop their consultation and clinical skills. As such, sometimes the GP trainee may ask their supervising GP to provide some guidance during their consultation.

Thank you for helping us to support the next generation of GPs. We wish all our GP trainees every success in their training!
